

CEWELD E CuAl8

TYPE Basic coated aluminium bronze electrode developed for welding on DC+. Good tensile strength alloy with good corrosion resistance.

APPLICATIONS CEWELD E CuAl8 is designed for joining steel with copper or its alloys and cladding steel or aluminium bronze.

PROPRIÉTÉS The weld deposit offers good wear and corrosion resistance even in seawater. Welding instructions:
- Preheating for sections >6 mm from 150 till 300 °C is recommended. Use the normal standard welding techniques.

CLASSIFICATION

AWS	A 5.6: ECuAl-A2
EN ISO	17777: E Cu 6100A
W.Nr.	2.0926
F-nr	31

CONVIENT POUR Aluminium bronze, Cladding steel, Shafts, Gliding surfaces, Joining steel to, Aluminium Bronze or Copper, etc.
Mat.n: 2.0916, 2.0920, 2.0928, 2.0460, 2.0932
