

CEWELD SA P-24

TYPE	Vacume melted, medium alloyed, Creep resistant alloy for sub arc welding.
TOEPASSINGEN	High temperature and creep resistant boilers, pipe work etc..
EIGENSCHAPPEN	Remarkable creep resistant micro alloy controlled alloy developped to offer high strenght and creep resistant properties at elevated temperatures. Combined with flux FL 155 excelent slag release will be obtained in single and multirun application, the neutral action of the flux offers reliable chemical annalisys to ensure the best possible creep properties.
CLASSIFICATIE	
GESCHIKT VOOR	Creep resistant steels , 7CrMoVTiB, P24/T24, ASTM A213, pipe steel, P24/T24, ASTM A213
GOEDKEURINGEN	
LASPOSITIES	
MECHANISCHE WAARDEN	
HERDROGEN	Not required
GAS ACC. EN ISO 14175
